RE: QXC TV/Internet Resident Meeting April 4, 2022

We have entered a contract for TV and Internet Services with QXC .

If all goes as planned, we will go live next Fall 2022.

QXC has begun planning and installation of a new fiber optic backbone at River Club. Digging and equipment placement will be happening over the summer. Access to individual units and details are forthcoming.

QXC's VP Rob DeCastro will visit River Club at 9:00am Monday April 4, 2022 to hold a Resident Meeting in the Club House.

The purpose of this is to answer question about QXC, their services, support, and to demonstrate the Firestick application that River Club will use instead of the set top boxes we currently use. Please attend this demo, especially if you are not familiar with streaming services. This is your opportunity to see what we are getting, knowing your responsibilities and QXC's responsibilities to have a smooth transition from AT&T.

There will be more communication in the future, but we wanted to get as many people knowing about this transition before they go away for the summer. Get prepared for the Fall 2022!!
